Food Delivery Web Application (Full Stack)

Built full stack app with React.js, Express.js, and Bootstrap. Designed responsive UI and integrated backend API.

Frontend GitHub : github.com/kunalanvithushan/FoodDeliveryWebAppUIDesingInReact.git

Backend GitHub : github.com/KelaxaVav/food_order_app_api.git

Pets adoption Web Application (Full Stack)

Virtual Pet Adoption Center A full-stack project that lets users manage virtual pets for adoption. Built with Node.js (Express) for the backend and React.js for the frontend, the application allows users to create, view, update, delete, and adopt pets. Each pet has dynamic moods based on how long they've been in the system
